

Tapestry.

What is Tapestry?

Tapestry is an online learning platform that documents your child's learning journey in all areas of the Early Years Curriculum. It is a fantastic tool which provides communication between home and school.

How we use Tapestry

We use this observation tool to capture the 'wow' and 'significant' moments in a child's learning journey. We will not document every moment in the child's play/learning. This allows practitioners quality time to engage and interact with children. Observations will be used to monitor a child's learning journey and will be used to identify children's emerging needs, interests and next steps.

Parents/Carers

All parents/carers will be given the opportunity to sign up to Tapestry via their personal email address. Once an email address has been provided, we will activate your account and assign you to your child. You will receive an email to set up your account and password. When the account is activated, you will be able to view all content linked to your child and add your own observations. You will receive notifications when a new observation is added.

We love to see observations from home; it is a great discussion point with the children and allows us to see what children do out of school. Parents/ carers can use Tapestry to capture their child's interests or any 'wow' and 'significant' moments in their child's learning journey. This may include learning at home, days out, holidays, special events, new skills, interests etc... Teachers will respond to parent/carers observations via the comment section and/or 'like' the observation.

Please see below for some useful videos on how to use Tapestry.
